

## IRONING MACHINE LANA B

The LANA B is a very solid ironing machine with ironing cylinders up from 35 cms for all kind of fur skins. This closed construction and a big working table, ensures safe operation without damaging lining or sleeves. The given inclination of the ironing table facilitates the treatment of the material. Changeable beating arms for different skins and treatment.

High output with 50 - 120 sheep- or lambskins and 250 minks per hour (depending on size), and an easy handling, even for unskilled staff, are the main advantages of this machine.

The wide distance between conveyor belt and ironing cylinder, makes it easy to handle the fur and avoids any damage by burning. The ironing temperature, adjusted at the control unit, is kept constant during the ironing process by thermal sensors in the cylinder. Reaching the desired temperature of the cylinder is indicated by an optical light signal.

The driven felt conveyor belt is pressed against the ironing cylinder pneumatically (6 bar) by means of a foot switch.

Ironing gases and dust are being sucked off by a strong exhauster, which will be supplied with the machine upon request.

Technical data:

LANA B

Ironing cylinders: 35 cms / 50 cms / 70 cms

Dimensions of machine:

LANA B 35

width: 170 cms  
depth: 125 cms  
height: 150 cms,  
weight: approx. 500 kgs

Connected load: approx. 4,5 kW, 400 volts, 3 phase
