

## DOUBLE-DRUM COMBING and FINISHING MACHINE LANA DT / KDT

Picture: Photomontage

A machine, especially for combing closed wild furs, such as mink or musquash. A particularly efficient machine, reducing working time by up to 60% as fur skins are being combed, cleaned and finished **on both sides in only one passage**.

Fur skins run continuously into the machine over the feeding table, pass two feeding rollers, run through both combing drums, which are arranged upon each other and adjustable towards each other, and then automatically run out at the rear.

Continuously variable feeding speed from 1 to 6 m/min. Slow passage results in stronger combing and fast passage in light combing and high output capacity.

Simple and safe operation, also for unskilled working staff. The machine is equipped with easily exchangeable steel roller teazles.

The machine is provided with a built-in connection for a suction device. The strong LANA single suction device is available on demand.

---

Technical data:

LANA DT

Working widths: 140 cms / 160 cms / 180 cms / 200 cms

Combing drum total: Ø 350 mms  
Combing drum speed: 200 rpm  
Feeding drum: Ø 55 mms  
Feeding drum speed: 1 – 6 m/min

Dimensions of machine:

LANA DT 140

width: 175 cms  
depth: 85 cms  
height: 155 cms  
weight: approx. 600 kgs

Connected load: approx. 1 kW, 400 volts, 3 phase

LANA KDT

Working widths: 80 cms / 100 cms / 120 cms

Combing drum total: Ø 300 mms  
Combing drum speed: 250 rpm  
Feeding drum: Ø 50 mms  
Feeding drum speed: 1 – 6 m/min

Dimensions of machine:

LANA KDT 120

width: 155 cms  
depth: 85 cms  
height: 125 cms  
weight: approx. 540 kgs

Connected load: approx. 0,7 kW, 400 volts, 3 phase
