

LAMB- and SHEEPSKIN COMBING MACHINE LANA PT/Z

A versatile combing machine for short, medium, and high wool lamb- and sheepskins, as model **PT/Z-K** for short and medium wool lamb- and sheepskins (combing drum with closed card clothing) and as model **PT/Z-H** for high wool lamb- and sheepskins (interval card clothing).

Skins pass towards the combing drum on a feeding belt and automatically return to the operator through a roller draw-off device; it is not necessary to take them off manually.

Model **PT/ZA** is equipped with an outlet belt instead of a sliding guide, model **PT/ZAP** is equipped additionally with a pneumatic pull-back of the feeding table.

The continuously variable feeding speed allows best adaption of the through-feed speed to the condition of fur skins. Hourly capacity approx. 40 to 200 skins.

A foot stop switch for the combing drum prevents the edges of the furs from tearing. It is possible as well to reverse the feeding.

The cleaning drum is adjustable towards the combing drum and is constantly running, thus ensuring a clean combing drum.

A safety switching device permits safe operation during intake of skins.

Clean working by means of the strong "LANA" single suction device.

Technical data:

LANA PT/Z (variant -K and -H according to desire)

Working widths: 120 cms / 140 cms / 160 cms

Dimensions of machine:

LANA PT/Z 140

width: 240 cms
depth: 140 cms
height: 145 cms,
weight: approx. 850 kgs

Connected load: approx. 10,5 kW, 400 volts, 3 phase
