

STRETCHING MACHINE LANA SpP

This particular successful stretching machine is suited for round wild furs such as mink, musquash, foxes, etc., obtaining best gain of size and softness of leather, avoiding any physical strain of the working staff due to stretching by foot and hips.

Available as pneumatic type for compressed air supply up to 10 bar. The stretching arms for the various sizes of furs like mink, musquash, or fox are easily exchangeable.

Capacity: approx. 300 - 350 mink skins or 250 fox skins per hour
