

STAKING MACHINE LANA STA10

The new redesigned staking machine type LANA STA 10 is used for stretching, softening and removing of meat particles of small and medium fur skins of all kinds.

The working width of the knife head is 100 mms, the knife head is equipped

with 10 knives.

These knives can be positioned about 90° each. According to the tilted position of the knives, the knife head can work in three directions; to the left, to the right and to the bottom.

Operation of the machine is very easy and simple and allows a high quantity of output.

The skin is being pressed to the rotating cylinder by an easy exchangeable piece of cow-hide.

Technical data:
